se:cube

*The pod solution
for open-plan offices*

Introducing a new dimension in agile working.

How a space unit creates new places.

Open space concepts, flexibility and new working styles shape the offices of the future. This brings a lot of advantages. Well-established structures are replaced, communication and cooperation are improved. Short distances, flexible meetings and spontaneous exchange shape the space and everyday working life of the future.

And what about concentrated work? For certain tasks, focus, silence and some distance from the environment are necessary. The office cube solution is one way of settling down from external influences and leaving disturbing noises “outside”. But it also applies the other way round: Where meetings can take place in small groups or telephone calls can be made without affecting others?

The se:cube – for work, for a break, for everyone.

of employees report

that the biggest distractions of working in an open-plan environment are colleagues having loud telephone conversations or an unscheduled meeting taking place.

Between proximity and distance.

When the work determines space.

Smart furnishings are fundamental in an office landscape where space is at a premium and has to be used efficiently. Proximity between different workstations enables ideal communication and cooperation. What can different work environments look like, and what happens when the work determines the space?

Whether a long telephone call, a small group meeting or concentrated individual work: the se:cube is the office cube element that creates a perfect symbiosis of proximity and distance. With a bright design and large glass surfaces, it creates transparency so users aren't entirely isolated. The se:cube fits harmoniously into its surroundings, just like a piece of furniture.

Within its four walls, ideas and productivity can truly unfold.

Static single workstations.

A standard office is organised according to defined structures and patterns. Work is more static and less flexible.

-  Meetings in a small group or focused working
-  Conference call or discussion session

Agile workspace concepts.

An office with an open space concept and an individual design enables a flexible, dynamic workflow. Exchange and cooperation are promoted.

-  Phone call or focused working
-  Small meeting or focused working
-  Conference call or discussion session

Three sizes, many possibilities.

Concentrate

A place that invites you to work alone in total peace or to make extended phone calls. The se:cube offers optimum acoustic shielding from the surrounding area – both inwardly and outwardly.

Communicate

A place to meet with colleagues where you're not distracted by external noise and you also won't disturb others at work.

Collaborate

A place that's perfect for small meetings and short brainstorming sessions with colleagues, yet still provides a barrier against disturbing outside noise.

Contemplate

A place to retreat to and reflect. Here, you can relax for a few moments and gather strength for your next meetings.

se:cube S: 1500 x 1000 mm

Especially suitable for phone calls and concentrated individual work.
For one to two people.

Soft Being

You can create a design that's unique to you with the Online Configurator.

The Online Configurator interface includes the following sections:

- EXTERIOR:** Options for size (S, M, L), back-glass, and LED-Stripe.
- Standard Colour / Optional Colours:** Selection of exterior colors.
- COLOUR COLLECTION:** Selection of interior colors for the Soft Being palette, including Wall, Furniture, Table, Frame, and Carpet.
- Configuration:** A central 3D view of a pod with a red top edge, surrounded by icons for different pod layouts.

A space brimming with possibilities.

Looking towards the future while setting new standards.

It's a space that inspires, allows users to work independently and adapts to an extremely wide range of requirements. Available in three different sizes and several design variants, the se:cube offers the perfect solution for the future of agile working. Its sophisticated structure ensures the ideal acoustics and atmosphere. The presence detector controls both lighting and ventilation, thus guaranteeing that nothing more and nothing less than the power actually needed is consumed. The red, all-round LED lighting indicates whether the module is occupied at any given time, and the individual colour scheme and the freely selectable interior round off the office cube solution. It'll therefore be a perfect match with the furniture in the surrounding area.

Has your office landscape changed? The se:cube can be assembled and dismantled without a great deal of effort, and moving it to its new location is an absolute doddle thanks to the unique lift technology.

The new way of working starts now.

Technical information

The se:cube doesn't just dazzle due to its timeless design; its technical features are excellent too: Sedus has thought of everything, from the lighting to the ventilation. In addition to the standard features, there's also a range of optional elements that can be installed and supplemented.

All-round, red presence lighting

Optional: The all-round, red strip of LEDs indicates whether the se:cube is occupied at any given time.

LED panel

Standard: Neutral white 4000 K
Optional: Dimmable as an additional feature

Acoustic panels

Standard: Covered with fabric
Optional: Integrated whiteboard

Safety glass

Standard: Toughened safety glass
Optional: Laminated safety glass with acoustic film

Unique lightweight panels

With an integrated cable system

se:cube specifics

Short assembly times thanks to the innovative lift technology. This also makes it extremely easy to move the se:cube to a new location, without any need for disassembly.

Size	S	M	L
Weight	330 kg	640 kg	900 kg
People needed for assembly			
Assembly time	3 h	4 h	5 h
Relocation	1,5 h	1,5 h	1,5 h

Control

Standard: The presence detector features a CO₂ sensor and controls the space fully automatically.

Optional: A switch for manual settings (dimnable light, adjustable ventilation)

Ventilation

Temperature and CO₂ sensors: concealed and nearly noiseless

Door

Frame: Powder-coated aluminium with a graphite-textured surface

Standard: Glass door

Optional: Glass door with lowerable floor seal

Furniture

Standard: Integrated in the wall panels (all Sedus colours available)

Optional: Flexible, adjustable furniture

The se:cube has been safety-tested by TÜV Rheinland.

An ingenious design right down to the last detail.

Variable, functional, stylish.

The se:cube cuts a conspicuously inconspicuous figure due to its timeless design. The design variants and details of the room module complement the modern office perfectly.

LED display.

With the red, all round strip of LEDs, you can see at a glance when the se:cube is occupied.

The whiteboard.

The integrated whiteboard gives small working groups the option of noting down their ideas and key points.

Furniture design.

Rounded desktops fit into the se:cube harmoniously.

Rounded corners.

The rounded corners add a timeless and puristic touch to the se:cube's overall design.

Lighting.

The LED lighting switches on when someone enters the se:cube and provides pleasant light.

Practical solutions.

Socket modules, double USB chargers and plug connections are attached within easy reach – above the desk.

Features.

Optional: An integrated monitor can be ideally used for presentations and video conferences.

Atmosphere.

The interior and the customised furniture make the se:cube feel completely cosy.

Outstanding for humankind and the environment.

Throughout its 145-year-long history, sustainability has always played a central role at Sedus, even when this expression didn't exist. A responsible use of resources and respect and appreciation for staff have been engrained in our corporate culture since the word go. However, we have always been, and remain, sustainable, due to the very fact that we produce high-quality products which result in tangible benefits. Products which help people and bring joy to their lives. Some items of our furniture have been in use by our customers for decades – which is perhaps the greatest example of sustainability.

The se:cube also reflects these values. Even during the development phase, the focus was clearly on customer benefits and the environmental footprint. For example, ecological compatibility was taken into account. We also attached a great deal of importance to resource conservation and recyclability. These are principles that have shaped how Sedus operates since the very beginning.
